RESIDENT TREE MAPPING PROJECT

One of the focus points of the Falcon Heights Climate Action Plan is the city's tree cover. The city wants to celebrate the diversity of trees planted throughout the city and give a platform for neighbors to share about their trees.

The city has developed an online map where you can upload your own backyard trees using a convenient survey and view other trees in your neighborhood. The survey asks you to share a few details about the tree, including its species if you happen to know it, and any memories or stories you have about the tree. The survey collects the location of the tree or allows you to pinpoint the location on a map (if not using a location-enabled device). You can also upload a photo of the tree!

Please fill it out to join the [Falcon Heights Resident tree map](#)! Your name and information will not be shared, only your beautiful trees!

The Tree Survey is available now! Just click on the button below.

CITY OF FALCON HEIGHTS ACTIVITIES SCHOLARSHIPS PROGRAM - 2025

The City of Falcon Heights is committed to promoting community engagement and active participation in recreational activities for our youth. The Activities Scholarships Program provides financial assistance to encourage Falcon Heights youth residents to enroll in activity programs offered by approved institutions in Falcon Heights and neighboring communities. As the City of Falcon Heights' program offerings are limited in 2025, we want to encourage youth to stay active and engaged. To encourage this youth participation in activities this Spring/Summer, the City is offering a reimbursement of up to \$25 per household to support children ages 4 to 17 attending camps, enrolling in arts or sports activities, taking swimming lessons and more.

Host registration is open on our website through 4:30 PM on Thursday, July 10 - [Falcon Heights Lawn & Garden Tours | Falcon Heights, MN.](#)

The Falcon Heights Lawn and Garden Tours will coincide with the [Lawns to Legumes Garden Tour Day](#). See their map for other tours you can take of native plant sites near Falcon Heights.

COMMUNITY <<< EVENTS & UPDATES

RESTORATION & UNITY DAY

July 6 is observed as Restoration Day, a time to remember how important it is that each of us cross traditional “borders” between communities, a day to meet someone and get to know someone different than us.

Restoration Day is about taking personal action and steps to build or restore relationships. This could be in the form of meeting a neighbor, mending a strained friendship or relationship, or even actively pursuing conversation with someone that a person would not naturally interact.

July 7 is observed as Unity Day. This day demonstrates healing has begun, connectedness is taking place, and thus the city as a whole demonstrates a measure of cooperative growth in inclusion and engagement. This could be a day for simple parties on the block, or even city-wide gatherings such as the BBQ at City Hall.

More information about both events can be found [here](#).

FALCON HEIGHTS ICE CREAM SOCIAL

Falcon Heights’ annual Ice Cream Social will take place on Thursday, July 17, from 5:00 to 7:00 PM. While the event has traditionally been held at Community Park, the event is moving to City Hall this year due to upcoming construction related to the Community Park renovation! More details to come, but please save the date!

NATURE NEWSFLASH <<<

MOSQUITOES

Mosquitoes, often jokingly referred to as “Minnesota’s State Bird”, are a common annoyance in the summer. Mosquito season is getting longer as the climate shifts to warmer, wetter, longer summers, and mosquitoes are a vector of disease. This is one of the ways climate change can create a direct threat to human health: as weather and climatic conditions shift to be more favorable for mosquito abundance, humans are impacted by higher incidences of mosquito-borne diseases. The Minnesota Department of Health lists climate change’s impacts on vector-borne disease risks as an area of concern. More information on [their website here](#).

Mosquitoes require stagnant water for their eggs to hatch. You can reduce the number of mosquitoes in your backyard by removing access to standing water and checking these areas regularly. Common places include:

- Waste tires left outside (mosquitoes that carry La Crosse encephalitis and West Nile virus are often found to have originated in waste tires)
- Decorative ponds that are not properly maintained (cycle the water to keep it from being stagnant or add fish to eat the larvae)
- Bird baths (they need to be cleaned and replenished every few days)
- Pools of water in loose tarps
- Empty planters that collect rainwater
- Neglected backyard pools
- Rain barrels that have holes or improper coverings (use a screen to prevent mosquitoes)
- Tree holes in trunks can contain water that is hospitable to mosquito eggs, including mosquitoes that carry La Crosse encephalitis
- Wheelbarrows and garden tools left outside in rain events can collect rainwater
- Clogged gutters can create a mosquito habitat that is difficult to monitor and remove

What can you do?

The Metropolitan Mosquito Control District offers free tire recycling for car and light truck tires from May-September. You can request a [tire pickup from your home here](#) and consult their website for other [resources and suggestions for mosquito control](#).

The [Mosquito Bucket Challenge](#) is a safer alternative to mosquito fogging for the other residents of your yard. Mosquito fogging kills pollinators, birds, and amphibians. You can create a designated breeding site and use a bacterium called Bti (used in mosquito dunks) to kill the larvae. This is not toxic for pollinators, pets, and humans, just mosquito larvae. You can also use dunks in ponds and gutters.

MAKE SURE YOUR HOUSE IS LEAD SAFE

Lead is a toxic metal that is harmful to humans, especially children under 6 and pregnant or breastfeeding adults. The most common source of lead exposure is paint and dust on windows in homes built before 1978. Any amount of lead exposure is dangerous. If you or someone in your household may have been exposed to lead, contact your healthcare provider.

Lead removal grant:
Ramsey County provides grant funding to reduce lead poisoning in children.

How it works:

- An environmental health specialist tests for sources of lead in your home.
- Windows that test positive for lead-based paint are replaced.
- Other lead hazards found in the home are addressed.
- Grant funds cover 80% of the project cost, homeowner is responsible for remaining 20%.

To learn more about qualifications, and how to clean up sources of lead in your residence, [visit this website](#).
